App Overview

Moї Дoкi is an offline-first application. This means it doesn't require an active internet connection to function, and all your data is stored strictly and securely on your own device. It automatically tracks the validity of your documents and notifies you when they are expiring, so you never miss a renewal deadline.

Getting Started

When you open the application for the first time, you can set up a secure **PIN Code**.

- This PIN prevents unauthorized access to your archived documents.
- *Note:* Please remember this PIN. Because your data is encrypted and stored locally on your device, there is no remote server that can recover a forgotten PIN.

User Interface Overview

The main interface is divided into several areas for quick access:

- **Top Bar:** Contains the main Search input, quick action buttons (Dashboard, Calendar Export, Print Report, Settings), and the "+ Add Document" button.
- **Sidebar / Filter Panel:** Allows you to quickly filter documents by status (Active, Archive, Expiring, Valid, etc.), Tags, or change the sorting order.
- **Main Document Area:** Displays all your documents as tiles or lists.
- **Dashboard (Statistics):** A visual overview of your document statuses (Total, Valid, Expiring Soon, Expired, Permanent) and a timeline of upcoming expirations.

Step-by-Step Guidance

Adding a Document

1. Click the **+ Add Document** button in the top right corner (or the floating button on mobile).
2. Fill in the essential details:
 - **Title:** The name of the document (e.g., "Basic Safety Training").
 - **Number:** (Optional) Document ID or serial number.
 - **Dates:** Enter the "Issue Date" and "Expiry Date". If the document does not expire, check the "Permanent / No Expiry" checkbox.
 - **Tags:** Add categories (e.g., "Medical", "Seaman's Book") to make filtering easier.
3. **Upload Files:** Click to browse or drag-and-drop a scan/photo of the document (PDF, JPG, PNG).
4. Click **Save**. The document is now stored in your archive.

Viewing and Editing Documents

1. Click on any document card to open the preview modal.
2. In the preview, you can view the attached file.
3. To edit the document's details, click the **Edit** (✎ Pencil) icon in the top right corner of the preview.
4. To download a copy of the original file, click the **Download** (⬇️) icon.

Searching and Filtering

- **Search:** Use the search bar at the top to instantly find documents by name, number, or description.
- **Filter by Status:** Use the left sidebar to show only "Active" or "Archive" documents, or filter by expiration status (e.g., "Expiring Soon").
- **Filter by Tags:** Click on any tag in the sidebar to only show documents with that specific category.

Tools & Settings

The application provides several powerful tools to manage your archive:

- **Dashboard** (📊 Chart Icon): View a summary of your documents and a 360-day timeline of upcoming expirations.
- **Print Report** (🖨️ Printer Icon): Generates a clean, printable summary list of all your currently active documents.
- **Calendar Export** (📅 Calendar Icon): Exports your document expiration dates as an .ics file. You can import this file into Google Calendar, Apple Calendar, or Outlook to get native phone reminders.
- **Backup & Restore** (💾 Save Icon): Found in Settings. You should regularly click "Backup" to save a secure copy of your entire vault to a .json file on your computer. If you switch devices, you can "Restore" from this file.

Disclaimer & Support

Disclaimer:

This application is created solely for personal use and is not for sale or distribution without the explicit permission of the author. I bear no liability in case of any leak, loss, or corruption of personal information. **This app is not collecting and/or transmitting any personal data over the internet;** all data is stored exclusively on your local device. The primary purpose of this application is only to make the life of the seafarer easier and to organize personal documents for tracking, monitoring, and control.
